🔥 Just like his mentor, Putin, Trump is allowing his rich supporters to profit from his Presidency. But the Wilks aren't content to just buy land for themselves, they are

cutting off access to PUBLIC land, thereby controlling a National Forest and the resources 🌲💧🚚💎

Meridian Idaho | June 22

What is not discussed in this article that I can tell you as a local.

The **wilks brother** bought up a long strip of land along a mountain range that is the only area through which one can enter a very large national forest. The Wilks brothers bought all of that land then closed down the only road access to millions of acres of public land. In doing so they successfully became the only people with access to that public land as well. They now control the access to a national forest, not just their land.

This article makes it seem like people want to be on the

wilks land. Not correct, people just want to get to the public land behind their property. The Wilks brothers aren't allowing it.

They want to protect what is theirs and in so doing deny others the public lands.

This is squarely on the Wilks and shady county and state politicians who allowed it because the Wilks paid for it. The County had the chance to establish an easement and did not. That's straight from the mouth of someone on the inside at the local County office. I heard that with my own ears.

The issue is access to public land, not private.

🇺🇸 Trump's team had the plan to steal land in the works before he won the election.

11 days after his inauguration he unveiled it.

🤔 What if Obama designated Bears Ears protected land because he KNEW Trump was PLANNING on opening it up mining for oil, gas, lithium, silver copper, gold etc and it would be owned by the new American Oligarchs he would place in his Administration!?! 💰🌲🌲💰 How does the land -grab scam work!?! Why would the Wilks who made BILLIONS fracking now want to “conserve the land”!?! Right now, it’s the greatest ploy to get obscene tax credits 🙅

These tax credits make land conservation a steal

A little-known federal incentive for land conservation lets property owners harvest tax savings of as much as 50 percent on their income.
